## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to tetrafluoroethylene polymer aqueous dispersion.

Group II, claim(s) 9, drawn to a tetrafluoroethylene polymer powder.

Group III, claim(s) 10, drawn to a tetrafluoroethylene polymer molding.

Group IV, claim(s) 11 and 12, drawn to method of producing a tetrafluoroethylene polymer.

2. The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while the special technical feature is a tetrafluoroethylene polymer aqueous dispersion is shared between the four groups, it does not offer contribution over the prior art because said tetrafluoroethylene polymer aqueous dispersion is disclosed in Tetsuo et al. (JP 59196308 A) (P2/L3-12).

3. Once the applicant elects either Group I, II, III, or IV, a further restriction to the following species deemed to lack unit of invention is required.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1., they lack the same or corresponding special technical features for the following reasons: while the special technical feature is a fluorovinyl group-containing emulsifier comprising fluorovinyl group-containing compound is shared between the six species of fluorovinyl group-containing emulsifier, it does not offer contribution over the prior art because said fluorovinyl group-containing emulsifier comprising fluorovinyl group-containing compound is disclosed in Tetsuo et al. (JP 59196308) (P2/L3-12).

The species of fluorovinyl group-containing emulsifier are as follows:

Species a-1) fluorovinyl group-containing emulsifier of general formula (I), (P6/L18-P7/L4);

Species a-2) fluorovinyl group-containing emulsifier of general formula (II), (P7/L5-P8/L7);

Species a-3) fluorovinyl group-containing emulsifier of general formula (III), (P8/L8-31);

Species a-4) fluorovinyl group-containing emulsifier of general formula (IV), (P8/L32-P9/L30);

Species a-5) fluorovinyl group-containing emulsifier of general formula (V), (P9/L31-P10/L31);

Species a-6) fluorovinyl group-containing emulsifier of general formula (VI), (P10/L32-P12/L4).

Applicant is required, in reply to this action, to elect a single species (a-1, a-2, a-3, a-4, a-5, or a-6) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The following claim(s) are generic: none of the claims appear generic.
6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species of the fluorovinyl group-containing emulsifier (species a-1, a-2, a-3, a-4, a-5, or a-6) are not mutually exclusive.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
